

A hand-drawn technical diagram of an aircraft fuselage cross-section. The diagram shows a large circular outline representing the fuselage, with a rectangular cutout in the center. The cutout is divided into two main sections: a smaller rectangular section at the top and a larger, more complex section at the bottom. The top section is labeled 'F-3'. A rectangular box with an arrow points to the boundary between the two sections, containing the text 'MAKE F-3 FROM HERE DOWN 1/4" PLYWOOD FOR FIXED NOSE WHEEL'. The diagram also includes various internal lines and shapes, such as a curved line at the top, a curved line on the right, and a curved line at the bottom. There are also some small rectangular shapes along the outer edge of the fuselage.
