

A hand-drawn technical sketch of a fuselage side profile. The drawing is oriented vertically on the page. It shows a large, rounded rectangular section on the left, connected to a narrower section on the right. The top line is slightly curved, and the bottom line is also curved. There are some dashed lines and irregular lines indicating construction or specific features. The text 'FUSELAGE SIDE' and '1/8" LITE PLY. (2)' is written in the middle-left area. A vertical line is drawn to the right of the text. The overall style is that of a preliminary engineering sketch.

FUSELAGE SIDE
